

TSHELO

Community Contributions, Simplified

✉ nono@tshelo.app

🌐 tshelo.app

THE PROBLEM

Community contributions are broken.

Across Africa, communities pool money for funerals, weddings, and

emergencies. But tracking is done on paper, records get disputed, and trust

erodes. The result? Awkward conversations, family disputes, and broken

relationships.

The Solution

Transparency for community funds.

Tshelo is a mobile app that tracks contributions in real-time, integrates with

mobile money, and keeps everyone informed and accountable. Funds go

directly to organizers—we provide the trust layer, not the payment processing.

Key Features

✓ Real-time contribution tracking

✓ Smart notifications & reminders

✓ AI receipt scanning & expense logging

✓ Event templates (funerals, weddings)

✓ Mobile money integration (M-Pesa, etc.)

✓ Regional pricing suggestions

BUSINESS MODEL

Transaction fees

1-2% on contributions

Premium

\$3/mo subscriptions

Future

Micro-loans & insurance

Unique Insight: "Rich Auntie" Sponsorship

Wealthy family members can sponsor specific expenses directly (catering, transport, venue) with full transparency on exactly where their money went. A cultural pattern competitors completely miss.

TARGET MARKET

Botswana (launch)

Kenya

South Africa

Ghana

Cultural practices: Stokvels • Harambee • Chama • Susu • Motshelo

PRE-SEED ROUND

\$250K

SAFE • 18-month runway

Use of funds

Product development 50%

Market expansion 25%

Operations & compliance 15%

Reserve 10%
